Porting XS Recommendation

To whom it may concern,

The Cayman Islands recently instituted Local Number Portability as mandated by the regulator (ICTA) for both fixed and mobile porting. The Islands four (4) carriers went through a detailed vetting process and Porting XS was selected over 3 other solution providers for several reasons which include experience with countries with relatively small populations, best technical solution and of utmost importance that the company is focused on LNP much unlike the bigger players that are spread thin doing everything from fraud protection to LNP.

The process from contract signing to going live was a fairly smooth process. Any issues during this process were a result of carrier differences and Porting XS played the role of impartial referee very well.

The Cayman Islands has been porting numbers since March this year and has had no issues with Porting XS or its system.

Telecayman recommends Porting XS as they are the most focused LNP provider with the best post LNP technical support. Please feel free to contact me by phone or email if there are any questions relating to LNP.

Sincerely,

Robert Kanner
