

## Inports® – Number portability THE COMPLETE MNP AND LNP SOLUTION

---

The introduction of number portability is an important step in the liberalization of telecommunications markets. The definition of number portability: To enable subscribers to retain a telephone number when changing their network or service provider. PortingXS would like to add: In an easy, fast, safe and customer friendly manner.

Inports® is the complete solution for the number portability process. The application supports portability of all types of numbers, from mobile (MNP) and fixed telephony (LNP) to ENUM, service and other types of telecommunication numbers. Inports® is available for regulators, telecom operators and service providers. Inports® can be fully integrated, be used as standalone portability solution and everything in between: whichever is preferred. Inports® consists of a number of services, which combined create the complete number portability suite.

### Reliable Central Number Database
